Class: Warnings_and_Precautions_ABRA

Annotations (1)

- `rdfs:comment` "**• Sensory neuropathy occurs frequently and may require dose reduction or treatment interruption. (5.2) • Sepsis occurred in patients with or without neutropenia who received ABRAXANE in combination with gemcitabine; interrupt ABRAXANE and gemcitabine until sepsis resolves, and if neutropenia, until neutrophils are at least 1500 cells/mm3 , then resume treatment at reduced dose levels. (5.3) • Pneumonitis occurred with the use of ABRAXANE in combination with gemcitabine; permanently discontinue treatment with ABRAXANE and gemcitabine. (5.4) • Severe hypersensitivity reactions with fatal outcome have been reported. Do not rechallenge with this drug. (4, 5.5) • Exposure and toxicity of paclitaxel can be increased in patients with hepatic impairment, consider dose reduction and closely monitor patients with hepatic impairment. (2.5, 5.6) • ABRAXANE contains albumin derived from human blood, which has a theoretical risk of viral transmission. (5.7) • ABRAXANE can cause fetal harm. Advise patients of potential risk to a fetus and to use effective contraception. (5.8, 8.1, 8.3)**"(`xsd:string`)
